

CUSTOM BRANDED (WHITE-LABELED) INTERACTIVE DIGITAL FRONT OFFICE MOBILE APP

DON'T DEVELOP YOUR OWN APP!

We have a better solution! Our apps are designed around creating a powerful experience of interactive, on-demand, conversational engagement. Large and small businesses are experiencing success with a dramatic increase in client/customer/partner engagement, resulting in a significant increase in the completion of business within their apps.

See below for more details!

HAVE YOUR OWN APP IN THE APP STORE IN DAYS!

WHY?

Many companies recognize the need and advantages of moving their company to a digital environment. We are first to offer a prepackaged digital front-office solution, that can be personalized and ready for your business in days instead of months or years and at a fraction of the cost of similar development.

Digital transformation involves using digital technologies to remake a process to become more efficient or effective. The idea is to use technology not just to replicate an existing service in a digital form, but to use technology to transform that service into something significantly better. Gartner says two-thirds of business leaders believe their companies must pick up the pace of digitalization to remain competitive.

For many businesses, developing their own app and waiting years for an ROI, isn't feasible or affordable. Most 3rd party custom developers will want to start their fee around \$50-k without a cap. Our secure and proven solution starts at \$6-k (for 25-customers-priced by # of customers) and is ready for primetime when you are.

WHO?

Any business with high-valued customers and partners. Businesses who do not want to be stuck in a legacy mode and want to better compete. Businesses that want to promote their branding, not a 3rd party software company's brand.

While startups thrive though their new ways of working and communicating, their innovative use of data and their integrated approach to advanced technologies, too many traditional organizations -- both in the private and public sectors -- are still stuck in legacy mode.

If you have or are considering a mobile app or need to get closer to your valued customers or partners, this app may be just what you have been waiting for.

OUR APP CAN DELIVER A VARIETY OF CONNECTED IN-APP COLLABORATION EXPERIENCES UNDER A SEAMLESS CONVERSATIONAL FABRIC. YOUR CUSTOMERS WOULD NOT HAVE TO LEAVE YOUR APP TO DO BUSINESS WITH YOU.

- Secure Messaging
- Transactions
- Digital Signature
- Video Chat
- Co-Browsing
- Task Management
- Document Tracking
- Reporting
- Chat Bots
- Annotations

MOBILE SOLUTIONS THAT WORK FOR YOUR BUSINESS

INCS' Interactive Custom Digital Front Office Mobile App comprises a suite of white-labeled applications for IOS, Android and Web. The in-app experience can be customized with select modules and comes with a Client/Customer Portal, Business Portal and Admin Portal. Our app also allows the easy integration of external systems, including document management systems, CRMs, transaction management systems, and more - to be a seamless part of a collaborative conversation. This app is designed to provide sophisticated relationship management capabilities to lend structure to the organization managing client relationships

HOW DO WE LEARN MORE?

Simple... Pick up your phone and give us a call or click the Contact Us button and send us a request and we will schedule a virtual demonstration with your team. We can show you the mobile app and how your customer-facing employees can interact with the customer or partner on their device. But, be prepared to be WOWed!

WHAT IS IT?

A proven and secure mobile app, now available with your white-labeled brand and your own front-office facing app in the app store.

It's a unique new way to stay connected with colleagues, clients and partners without the need for cumbersome and antiquated emails.

Messaging is the new normal, and our Digital Front Office App is so much more, with powerful layers of collaboration that can operate as a suite or with modules imbedded into the context of your app (via API or SDK). Improve communication and the relationship thru text and voice chats, live video, meetings, import pictures, videos, or any file, add rich graphic and vocal annotations, eSign agreements and manage tasks – all within a simple conversation.

WHEN?

Sometimes it's all about being FIRST – Act Smarter & Respond Faster

- Know your customer's journey and discover their intent
- Serve with personalization and consistency
- Win every interaction and earn lifelong customers
- Arm your teams with the tools and insights to act quickly
- Spend time on innovation and not integration
- Scale and adapt instantaneously

*Contact our consultants today!
In most cases a custom mobile app will start at \$50-K and take months or years to complete. Ours is a fraction of the price and can be ready in days or weeks.*
